

I have been in chronic pain for 7 yrs. Before I came to Dr. Bond I was with a doctor for 5+ years. I never experienced a sense of compassion and individual treatment. Here, I feel as if I am treated for my medical problems and not as a part of the general population. I get the compassion that must chronic pain patients need. I have been thoroughly explained what is going on with me and now have a much better understanding. I also have Faith that Dr. Bond is doing everything he can to get me through this.
